SECURITY CONSULTING

Security Consulting Services

Offensive-led advisory — AppSec programs, tooling evaluation, product audits, maturity assessment.

KEY BENEFITS

Why This Matters

Offensive-Led Advisory
Every consultant has active pentest expertise — advice grounded in real-world attacks.

16+ Vendors Evaluated
Independent SAST/SCA/DAST/ASPM assessment — unbiased recommendations.

Measurable Outcomes
OWASP SAMM / BSIMM maturity scoring with concrete improvement roadmaps.

YOUR CHALLENGE

Your organization needs strategic security guidance from practitioners who understand real-world attacks:

- How mature is your current application security program?
- Which security tools deliver value for your stack?
- Is your product ready for launch from a security perspective?
- How do you embed security into the SDLC?

Why Technieum as Your Trusted Partner
Technieum brings 6 proprietary AI platforms, an in-house R&D team actively hunting zero-days, and AI-powered methodologies that deliver validated, exploitable findings with guaranteed zero false positives — enabling your team to focus remediation effort where it matters most.

OUR SOLUTION

Services Overview

Technieum's consulting bridges offensive findings and organizational maturity — with consultants who actively conduct penetration tests.

1	**AppSec Program Development**	Full program design — maturity assessment, tool selection, process definition, developer enablement.
2	**Product Security Audits**	Pre-launch/M&A assurance — architecture, code, deployment, threat modelling.
3	**Security Tooling Evaluation**	Independent assessment of 16+ vendors — SAST, SCA, DAST, ASPM, CNAPP.
4	**Architecture Advisory**	Auth/authz design, API security, zero trust, secrets management guidance.
5	**SDLC Security Integration**	CI/CD security gates, threat modelling, security champions, vulnerability management.
6	**Maturity Assessment**	OWASP SAMM / BSIMM benchmarking with gap analysis and improvement roadmap.

THE TECHNIEUM EDGE

Why Technieum for Consulting

Our Methodology
Discovery → maturity assessment → strategy → tooling evaluation → program design → implementation support → quarterly advisory.

Offensive-Led
Active pentest expertise — advice grounded in real attacks, not theory.

16+ Vendor Evaluations
We know which tools work for which stacks — unbiased.

Full Program Design
Maturity → tool selection → process integration → optimization.

Measurable Maturity
SAMM/BSIMM scoring with quarterly tracking and demonstrated progression.

Standards Alignment

Every Technieum engagement aligns with globally recognized security frameworks including OWASP Top 10, OWASP API Top 10, OWASP LLM Top 10, PTES, NIST CSF, NIST AI RMF, MITRE ATT&CK, CIS Benchmarks, IEC 62443, and ISO 27001:2022. Our team holds OSCP, OSEP, CRTE, CRTP, eWPTX, eCPPT, and CEH certifications. Technieum is ISO 9001:2015 and ISO 27001:2022 certified.

OUR METHODOLOGY

How We Deliver Results

Technieum's consulting methodology follows a structured five-phase approach designed for security program development — combining offensive security expertise with organizational maturity assessment and strategic advisory.

Discover	Analyze	Attack	Report	Remediate
Asset enumeration	ToIP intelligence	Manual exploitation	CVSS/CWE scoring	AI-powered fixes
Tech fingerprinting	Logic extraction	Business logic test	PoC evidence	Stack-specific code
OSINT gathering	Threat modelling	Chain validation	Exec summary	Config guidance
Scope validation	Risk prioritization	Privilege escalation	Test case docs	Retest validation
Port scanning	Attack planning	Lateral movement	Playbook docs	Closure sign-off
Service detection	Playbook generation	Data exfiltration	Risk heatmap	Knowledge transfer

Phase 1 — Discover

Current-state assessment evaluates existing security programs, tooling stacks, team capabilities, SDLC integration points, and organizational maturity using OWASP SAMM or BSIMM frameworks. Stakeholder interviews and process documentation review.

Phase 2 — Analyze

Gap analysis identifies maturity gaps, tooling deficiencies, process weaknesses, and skill shortages. Target-state definition aligns security program objectives with business goals and risk appetite. Vendor evaluation assesses 16+ security tooling options.

Phase 3 — Design

Program blueprint development — policies, processes, metrics, team structure, tool selection, SDLC integration points, and security champion program design. Product security audit frameworks for pre-launch and M&A assurance.

Phase 4 — Implement

Hands-on implementation support — tool deployment, CI/CD security gate configuration, developer training delivery, security champion enablement, and vulnerability management workflow setup. Measurable KPIs established.

Phase 5 — Optimize

Quarterly advisory reviews tracking maturity progression against SAMM/BSIMM baselines. Program optimization based on metrics data. Continuous improvement recommendations. Knowledge transfer ensuring long-term sustainability.

DELIVERABLES

What You Receive

Every engagement produces four comprehensive deliverables designed for different stakeholders — from technical teams requiring reproduction steps to executives needing business impact context.

Technical Report	Management Report	Threat Model Report	ToIP Playbook
CVSS-scored, CWE-mapped findings with proof-of-concept evidence and step-by-step reproduction instructions for every vulnerability discovered.	Executive-level risk summary with business impact analysis, prioritized recommendations, and strategic remediation roadmap for leadership.	Comprehensive threat landscape analysis with attack vectors mapped to MITRE ATT&CK framework specific to your environment.	Target-specific attack playbooks generated from 15,000+ real-world disclosed vulnerabilities via our RAG-powered intelligence engine.

- ✓ **Technical Report**
  Detailed findings with CVSS scoring, CWE mapping, proof-of-concept evidence, and step-by-step reproduction instructions.
- ✓ **Management Report**
  Executive-level risk summary with business impact analysis, prioritized recommendations, and strategic remediation roadmap.
- ✓ **Threat Model Report**
  Comprehensive threat landscape analysis specific to your environment, attack vectors, and adversary profiles mapped to MITRE ATT&CK.
- ✓ **ToIP Playbook Document**
  Target-specific attack playbooks generated from 15,000+ real-world disclosed vulnerabilities via our RAG-powered intelligence engine.

All deliverables are produced within the agreed timeline with milestone-driven tracking. Critical findings are escalated immediately via the OffSec Management Portal — you never wait for the final report to learn about urgent risks.

Ready to Secure Your Organization?

Partner with Technieum for AI-powered offensive security with zero false positives.
