Offensive Security Services

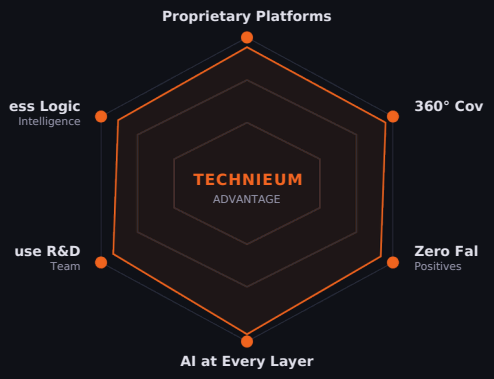
- 360° Coverage
- Human Expert Validated Results
- AI-Powered Evaluation and a Dedicated R&D Team.

WHY TECHNIEUM

The Competitive Edge

In a market of identical vendors running identical scanners, TECHNIEUM delivers what others structurally cannot.

- **6 Proprietary AI Platforms**
  ToIP - Technieum Offensive Security Intelligence Portal, LLM Attack Suite - (Large Language Model Security Testing), AD Suite, ASM (Attack Surface Management), AI SAST - (AI-Powered Static Application Security Testing), AI SCA - (AI-Driven Software Composition Analysis) — all built in-house.
- **360° Coverage Per Engagement**
  Every project includes SAST + SCA + ASM + AD + AI/LLM testing — all cross-correlated. One engagement, complete visibility.
- **Zero False Positives — Guaranteed**
  AI accelerates discovery; human experts validate every finding. You act on real risk, not scanner noise.
- **In-House R&D Team**
  Dedicated researchers hunting zero-days and publishing CVEs. Research feeds directly into every engagement.
- **AI at Every Layer**
  From agentic recon (100+ tools) to RAG-based intel (15K+ reports) to AI remediation — AI amplifies every stage.
- **Timely Delivery — No Delays**
  Milestone-driven with daily updates, weekly reviews, and instant critical escalation.
- **Accurate, Actionable Remediation**
  AI-powered, context-aware fix guidance tailored to your tech stack — remediation that actually works.



PROPRIETARY PLATFORM ECOSYSTEM

Platforms. Built In-House.

Proprietary platforms powering every engagement — capabilities no other vendor can offer.

ToIP — OffSec Intelligence Portal

RAG-based semantic search across 15,000+ real-world disclosed vulnerabilities. Instant attack playbooks with exact payloads, WAF bypass techniques, and chained exploit sequences. Hours of research → one query.

AI-Based ASM

100+ recon tools across 4 phases: subdomain discovery, DNS resolution, deep analysis, vuln validation.

AI SAST & AI SCA

Business logic-aware static analysis. Dependency scanning with exploitability and reachability scoring.

OffSec Management Portal — Central Command

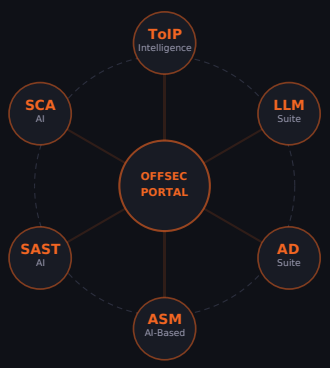
All platforms unified. Multi-tester collaboration, CVSS scoring, CWE mapping, one-click reporting, real-time dashboards, retest tracking. 30–40% admin overhead reduction.

LLM Attack Suite

1,005+ attack prompts across 10 OWASP LLM categories. Automated simulation, real-time scoring.

AD Suite

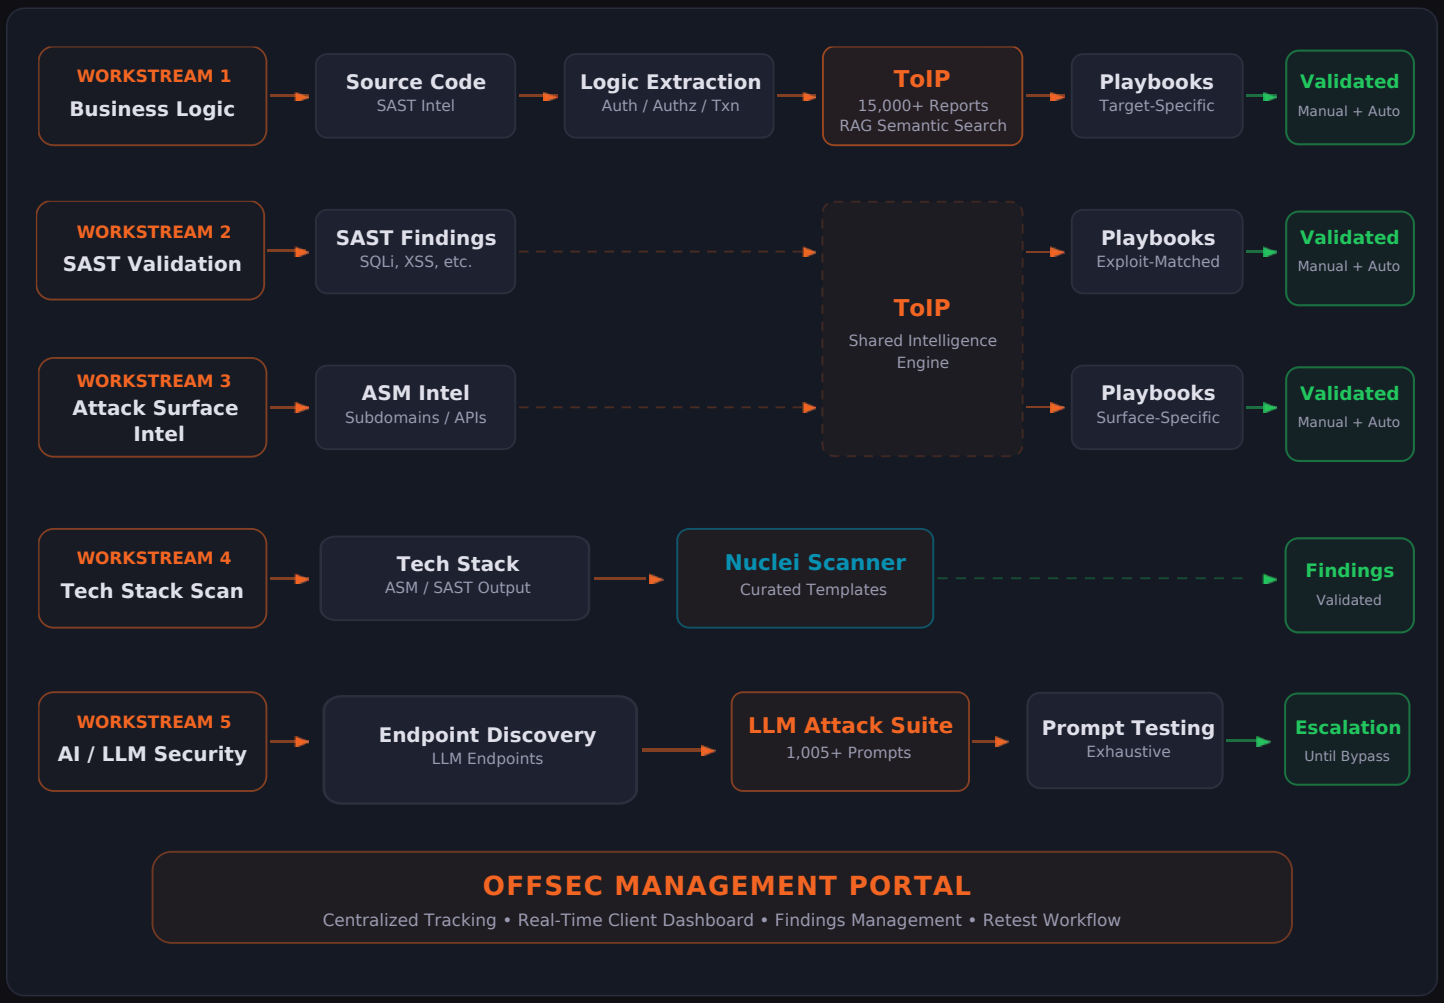
Automated attack path discovery, privilege escalation mapping — Kerberoasting, DCSync, Golden Ticket.



THE TECHNIEUM OFFENSIVE WORKFLOW

Parallel Workstreams. One Unified Pipeline.

Five converging intelligence pipelines — all centrally managed in the OffSec Management Portal.



SERVICES PORTFOLIO

Comprehensive Offensive Security Services

18+ specialized service lines — all AI-enhanced, all backed by proprietary platforms.

Infrastructure & Network

- External Infrastructure Testing (ASM)
- Internal Network Penetration Testing
- External Network Penetration Testing
- Active Directory Security Audit
- Wireless Network Security Testing
- Build & Configuration Review
- Vulnerability Assessment

Application Security

- Web Application Penetration Testing
- API Penetration Testing (REST/GraphQL/SOAP)
- Mobile Application Penetration Testing
- Thick Client Penetration Testing
- Source Code Review (AI SAST)
- Software Composition Analysis (AI SCA)
- Architecture Security Review

AI & Emerging Technology

- AI & LLM Penetration Testing
- MCP (Model Context Protocol) Testing
- Threat Modelling (AI-Enhanced)
- AI-Powered Remediation Guidance

Social Engineering & Assurance

- Phishing Impact Testing (MFA Bypass)
- End-to-End Remediation Guidance
- Retesting & Validation

STANDARDS ALIGNED

OWASP Top 10 | OWASP API Top 10 | OWASP LLM Top 10 | PTES | NIST | NIST AI RMF | CIS

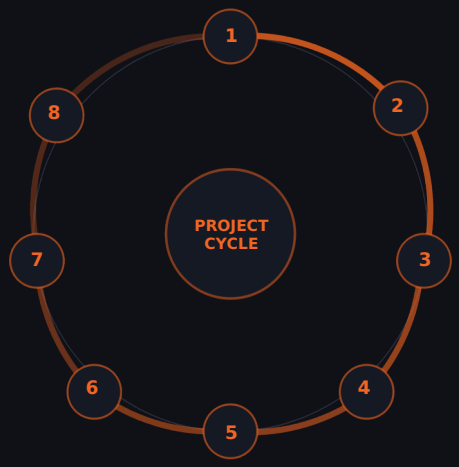
TEAM CERTIFICATIONS

OSCP | OSEP | CRTE | CRTP | eWPTX | eCPPT | CEH | ISO 9001:2015 | ISO 27001:2022

THE TECHNIEUM PROJECT CYCLE

From Onboarding to Delivery

Structured. Milestone-driven. Daily updates. Instant critical escalation. No delays.



1. **Scoping & Planning**
   Define objectives, rules of engagement, target scope. Formal test plan. Dedicated PM + lead pentester.
2. **Automated Reconnaissance**
   Agentic AI deploys 100+ tools: subdomain discovery, DNS resolution, web probing, initial vuln scanning.
3. **Intelligence Integration**
   ToIP frames attack scenarios. AI SAST extracts business logic. ASM feeds surface-specific playbooks.
4. **Collaborative Testing**
   Multi-tester parallel execution via OffSec Portal. Daily updates. Critical findings escalated immediately.
5. **Deep Vulnerability Analysis**
   Business logic exploitation, privilege escalation chains, complex chaining. Every finding validated.
6. **Reporting & Documentation**
   Executive summary, technical report (CVSS + CWE), business logic test cases, playbook docs, PoC demos.
7. **AI-Powered Remediation**
   Accurate, context-aware fix guidance tailored to your tech stack — not generic suggestions.
8. **Retesting & Validation**
   Verify every remediation. Confirm closure. Update live dashboard. Final sign-off with evidence.

THE TECHNIEUM DIFFERENCE

Conventional Vendors vs. TECHNIEUM

DIMENSION	CONVENTIONAL VENDORS	TECHNIEUM
Coverage	Siloed — web OR network OR cloud	360° — SAST + SCA + ASM + AD + AI/LLM every project
Business Logic	Generic OWASP checklist	Full logic extraction → target-specific attack playbooks
Attack Intel	Individual tester knowledge	15,000+ disclosed reports via ToIP (RAG search)
Tooling	Commercial scanners only	6 proprietary AI platforms + commercial tools
AI/LLM Testing	Not offered or basic	Dedicated LLM Attack Suite — 1,005+ prompts
Validation	Automated results, false positives	Human-validated — zero false positives guaranteed
Deliverables	Static PDF, no tracking	Live portal + test cases + playbook docs + retest
Remediation	Generic fix suggestions	AI-powered, accurate, context-aware guidance
Delivery	Delays, scope creep common	Milestone-driven, daily updates, on-time guaranteed

"AI as a Force Multiplier, Not a Replacement."

Human in the Loop — Every Layer. Every Finding. Every Engagement.
